Summary

Hello! I'm a passionate coder and web developer skilled in HTML, CSS, JavaScript, Python, SQL, DBMS, and more. I am very passionate and confident in what I do, driven by a deep love for coding and web development. With a specialization in software product engineering and Computer Applications, I'm on a mission to harness technology for positive change. My goal is to create impactful solutions that enhance our world through innovation and collaboration. Let's connect and explore how we can leverage technology to make a meaningful difference.
